**NOTE:**

**Sheep will be sold in pounds sterling.**

**For this auction there will be minimum bid prices as follows:**

<b>Ewe lambs</b>	<b>£175</b>
<b>Shearling ewes</b>	<b>£225</b>
<b>Ram lambs</b>	<b>£250</b>
<b>Shearling rams</b>	<b>£300</b>

**Breeders may also put a reserve price on their sheep above these minimum bid prices.**

**Any sheep sold outside the ring MUST NOT be below these minimum prices and must be booked through the auctioneer.**

**SALE REGULATIONS:**

Show & Sale is held subject to HDSBA Rules and the conditions of sale as recommended by the LAA and the Auctioneers Standard Conditions of Sale.

All females entered must have been Registered with HDSBA, males must have been Birth Notified or Registered and entries are only be accepted from fully paid up members of the Association.

Entry is restricted to sheep that are Maedi Visna Accredited - relevant form **must** accompany the sheep.

Sheep entered from Scrapie Monitored flocks must have a copy of the Monitoring certificate.

All sheep must be tagged in accordance with DEFRA and HDSBA regulations and **must be accompanied by their genotyping certificate (if tested).**

Pre-Sale Inspection: all sheep will be inspected by an official HDSBA inspector on arrival. Sheep may be **rejected** from the Show & Sale if they are: below the required standard of conformation, and size and/or condition; incorrectly docked; daggy; faulty in teeth, testicles, or udders; lame or show obvious signs of disease. Inspection shall not be implied to give any warranty as to soundness under the Conditions of Sale. Any sheep not ear tagged in accordance with HDSBA (DEFRA) regulations will be rejected. The inspector's decision will be final. **Note: HDSBA & its inspectors do not give any form of warranty on any sheep sold at this Sale**

Females only accepted if: not pregnant; not lambled within 30 days of arrival at the Sale; not subject to procedures which change the seasonal breeding pattern.

## **GENERAL CONDITIONS OF SALE:**

The highest bidder shall be the buyer, subject to the right of the Auctioneers to reject any biddings they may think fit, and subject to the right of the Vendor to bid. If any dispute arises as to the highest bid, such disputes will be settled by the Auctioneers, or at their option the Lot in dispute may be resold.

No bidding shall be retracted. The biddings will be regulated by the Auctioneers.

Every Lot must be taken with all faults and miss-descriptions (if any). The Auctioneers, on behalf of themselves and the vendor, shall have a lien on each Lot for the purchase money thereof until actual payment. Notwithstanding such lien and the right of possession aforesaid the Auctioneers will not undertake any risk as regards any Lot, nor liability whatever as to the preservation or delivery thereof.

The Vendor reserves the right to bid.

The Purchaser of each Lot shall, immediately on the fall of the hammer, give to the Auctioneer his/her exact name & address and, if required, then to pay the purchase money of such Lot, otherwise at the conclusion of the day's sale.

**Cheques will only be accepted if reasonable proof of identity can be established.**

Neither the Vendor, HDSBA nor Auctioneers will be responsible for any accident or damage to life or limb prior to or during the progress of the sale, or at any time during the removal of the Lots.

On failure of compliance with these Conditions, the Auctioneers may resell the Lot or Lots either by Public Auction or Private Contract, and the deficiency (if any) with all expenses shall be made good by the defaulter at this sale, but such defaulter shall not be entitled to any surplus which may arise by such resale. Such expenses shall be deemed to include the usual Auctioneers' commission on the resale and all the expenses for porters, advertising, market tolls, carriage, care, keep & otherwise.

## **History of the Breed**

Hampshire Down flocks were established more than 150 years ago. The breed originated by crossing the Wiltshire Horn and the Berkshire Knot with the Southdown. These flocks became very important in maintaining fertility on the thin soils of Wiltshire, Hampshire and Berkshire and were numerous across the whole of the South of England. There were massive sales at Wilton, Overton, Weyhill and other fairs with as many as 20,000 at each one.

## **Description**

Face and ears are a rich dark brown, approaching black, with wool over the poll and forehead. Wool is white with an average staple length. Body deep and symmetrical with ribs well sprung, broad, straight back, flat loins, wide rump and deep heavily muscled hind legs and breast. Legs being strongly jointed and powerful are set well apart.

## **Main Purpose of the Breed**

The breed has been developed to provide terminal sires for commercial flocks. Hampshire Down sired lambs are early maturing quality butchers' lambs. Many pedigree flocks are Signet recorded and scanned to encourage the breeding of lean fast-growing sheep. This gives the commercial flockmaster the opportunity to use high growth-rate, lean producing rams.

## **General Information**

Hampshire Downs lamb naturally in December with a lambing percentage of around 150-180%. The lambs are very robust and hardy being able to withstand most climatic conditions from a very early age. They are extensively kept both on pastures and uplands and will finish on grass quickly with no concentrates. From birth a Hampshire Down crossbred lamb will reach 19 kg deadweight in under three months.

The carcass is well fleshed with one of the highest eye muscle scores of any breed. Usually grading extremely well, the modern Hampshire has been selected to pass on its characteristics plus leanness to its progeny whilst retaining the excellent succulence and flavour for which the breed is renowned.

The ewes last well and regularly lamb for up to 10 or 12 years. Hampshire Downs will take the ram at any time of the year, therefore three crops of lambs can be obtained in two years. One of the most important characteristics is outstanding food conversion which enables it to survive well in marginal grass conditions.

Hampshire Down wool is white, average staple length 9cm, dense and fine texture, being graded to 56-60's (Bradford count). Rams clip about 6.75kg, yearling ewes 4.5kg and older ewes 2.7kg of wool. The principal use is for fine felts and blending with other wools owing to its good wearing quality.

Hampshire Downs can be found in more than 40 countries, from Canada to New Zealand and Eastern Europe to Chile. The breed flourishes both in the heat of South Africa and the cold of the Andes.

Average prolificacy	<i>Ewe lambs 110%</i>	<i>Ewes 150-180%</i>
Average birthweight	<i>Singles 4 - 7 kg</i>	<i>Twins 3 - 6 kg</i>
Average adult bodyweight	<i>Ewes 80kg</i>	<i>Rams 120kg</i>

### **Breed Development**

The Sire Reference Scheme, in partnership with Signet, helps keep the breed to the forefront in satisfying the demands of both the discerning consumer and supermarket buyer. In 2006, 45% of the Hampshire Down Sheep Breeders' Association's lamb registrations were SRS recorded, the highest volume of any breed association or society. Signet SRS combined with whole body CT scanning, the two modern approaches to sheep breeding, are helping the Hampshire Down Sire Reference Breeding Group to identify quality high index ram lambs and with intelligent use of EBVs to improve key commercial traits and position the breed among the leading terminal sires. In 2007 HDSBA joined the BASCO flock book recording scheme, which will allow breeders to further evaluate the Hampshire Down's inherent "Easy-Care" characteristics: easy lambing; quick to suckle; hardy (tight skins); docile; fast to finish off grass & milk. Importation of Hampshire embryos and semen from leading flocks in New Zealand has also widened the gene pool available to breeders in recent years.
